# HOME BUILDING Guide

**GIVE US THE  
OPPORTUNITY TO SHARE  
OUR EXPERIENCE WITH YOU  
FROM THE  
VERY BEGINNING  
OF YOUR HOME PLANNING**

During our many years of experience we have learned much that adds to the beauty, efficiency and comfort of today's homes. This experience plus a vast amount of helpful literature is at your disposal. We would be glad to discuss your new home building needs at your earliest convenience.

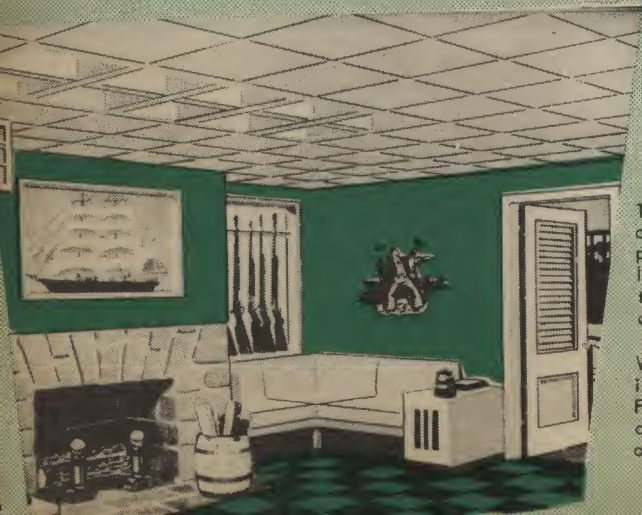

## LOT and LOCATION

You'll want to live in a neighborhood that suits you economically as well as your individual taste. You should thoroughly investigate such items as taxes, sewage, zoning laws, streets, sidewalks, etc.; location in regard to schools, your work, shopping districts and the location of bus lines. Make sure the lot is the proper size, shape and grade for the house you have in mind. A little more forethought and planning at the beginning can often save many headaches and much money in costly errors later.

## CONSTRUCTION

- ROOFING    ● INSULATION
- STRUCTURAL WORK
- SIDING    ● FOUNDATION

The roofing and side structure of your home protect the entire investment. They must be of indisputable quality and properly installed to perform this most important function. Faulty materials and careless workmanship cause expensive repairs in a few years.

## INTERIORS and DESIGN

- FLOORS    ● WINDOWS
- WALLS    ● CLOSETS

The interior of your home is where you actually live, and it should be planned accordingly. Of great importance are the size and number of rooms, closet space, lighting needs and floor types. Intelligent planning to take care of your actual needs will eliminate many disappointments later.

Wood, with its versatility in application and finishing, is the ideal material for this type of home planning. Floors, windows, walls, etc. of wood lend warmth and character to each room, provide durability and variety of color. You'll enjoy your home more with wood interiors.

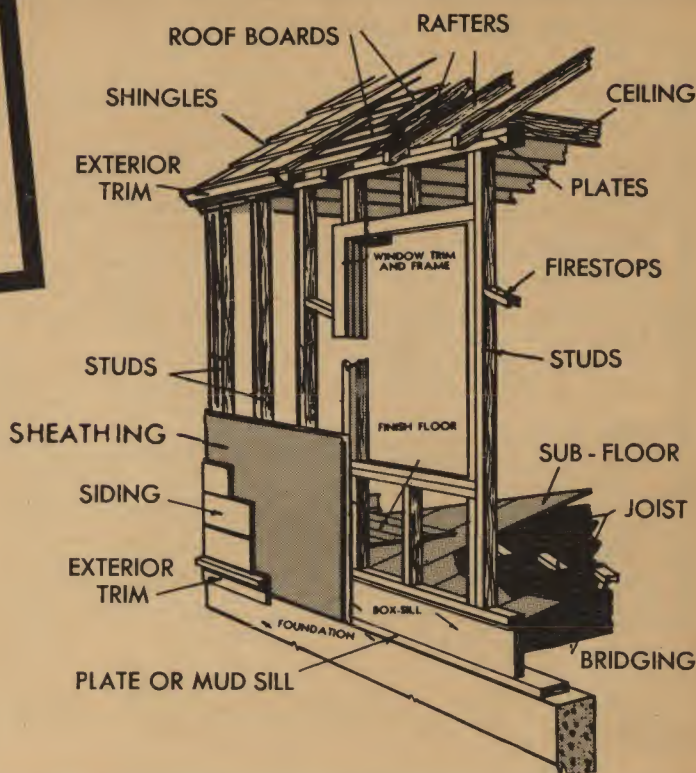

# USE THE RIGHT GRADES OF LUMBER WHEN YOU BUILD AND SAVE!

**THERE ARE DIFFERENT GRADES OF LUMBER... EACH HAS ITS SPECIAL USES... LET US ADVISE YOU ON YOUR NEEDS**

When you build -- WOOD is your BASIC construction material! Long the standard material for building construction. Combines strength, beauty, ease of shaping and applying, economy and durability. Let us help you in the selection of the proper grade of lumber for your home. We're glad to be of service.

Pictured at the right are important factors in your home. If you don't know about them, know your lumber dealer.

## THERE IS A DIFFERENCE IN LUMBER

### STRUCTURAL FRAMEWORK

Here is where a little difference in quality makes a big difference in results. A few dollars "saved" here in inferior quality, costs you many extra dollars of labor. The lumber in the frame work should be reasonably dry and should be straight - and our stocks of Douglas Fir are just that.

### SHEATHING and SUBFLOORING

The selection of sheathing and sub flooring for a building, be it a home or a farm building, does not seem important until you come to put on the exterior siding or lay the finish floor. Then it is mighty important. Let us advise you the most economical, yet durable sheathing and sub flooring for your building.

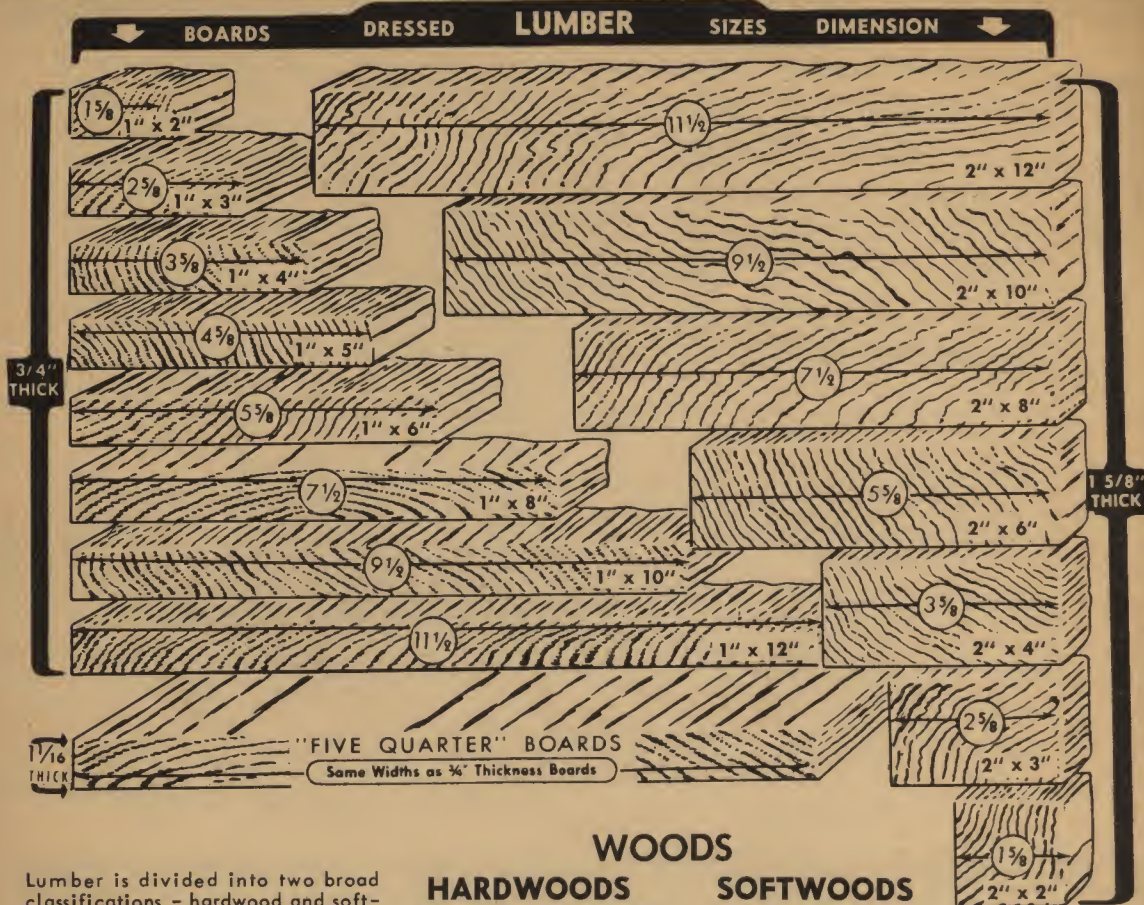

### EXTERIOR SIDING

There are many sizes and types of exterior siding for your home. Be sure to choose one in keeping with your architecture, but above all "know" siding when you buy it or "know" us to "know" that there is such a big difference in the quality of siding. Most exterior siding should be vertical grain. Technical? Yes, but very important.

# HERE'S YOUR GUIDE TO BUYING LUMBER

## WOODS

Lumber is divided into two broad classifications - hardwood and softwood. Hardwood is the product of broad-leaved deciduous trees. Softwood is the product of needle or scalelike-leaved conifers, popularly known as evergreens. The common woods in general demand are listed to the right -

### HARDWOODS

MAPLE  
OAK  
ASH  
CHERRY  
WALNUT

CHESTNUT  
HICKORY  
ELM  
BIRCH  
GUM

### SOFTWOODS

CEDAR  
FIR  
PINE  
REDWOOD  
SPRUCE

## BOARDS

Charted above are the standard popular sizes of boards. The dimensions shown are the rough cut or Nominal sizes. Actual dressed sizes are shown in the side brackets and within the individual board illustrations. Because of the need for exactness in

finishing use, it would be well to get in the habit of ordering boards according to actual dressed sizes. 4' to 16' lengths in multiples of 2' are generally available.

## DIMENSION LUMBER

Nominal sizes are shown in quote marks. Actual sizes are shown in side bracket and within the individual illustrations. Dimension lumber is gen-

erally available in lengths from 4' to 24' in multiples of 2', as in Timber.

## YARD LUMBER GRADES

This classification largely embraces the variety and sizes of softwood lumber used for general building purposes. Yard lumber is broken down into 2 general classes according to quality and use.

1. Select lumber suitable for natural finishes. Grade "B and Better" is generally clear and free from defect. Grades "C" and "D" possess only minor defects and blemishes.

2. Common lumber for general utility and construction. Usually painted over to cover defects. Can be stained where knotty pine effect is desired. Grades (1) and (2) sound and usable with minimum waste. Grade (3) contains more numerous defects.

## AN INVITATION...

## *to take advantage of our* CONVENIENT PAYMENT PLANS

### 1—A REGULAR CHARGE ACCOUNT:

With our 30 Day Charge Account you can order by phone, mail or in person and pay for your purchases within 30 days, with no carrying charges.

## Ripplewood TEXTURED PLYWOOD

LARGE PANELS AND SQUARES

● EASY TO INSTALL ● EASY TO FINISH

This richly textured wall paneling with its feathery wood grain brought into subtle relief by a special manufacturing process, accentuates the beauty of nature. With either natural or painted finish you can get many beautiful effects. Come in today for more information.

Only **25c** Sq. Ft.

# Weldtex

Has an unusual textured finish of deep, irregularly-cut grooves running the full length of each panel. These grooves minimize expansion and contraction. There is no grain raise or "checking". Nail holes and joints won't show. An excellent paneling for new or old construction. Fits any decorative scheme - inside or out. Exterior grades are amazingly tough and weather-resistant, will not warp, buckle, split or "check" when exposed to the elements.

**10 We Can SAVE You Money on Your BUILDING NEEDS**

ADD CHARM TO  
YOUR HOME WITH

# Genuine WOOD PANELING

There is no possession that can add so much charm and livability to a home as a room or more that is paneled in warm, natural wood. Yet many home owners deprive themselves of this extra living pleasure because of mistaken ideas of what it costs. Instead they put up with ordinary walls and their common appearance and trouble to maintain.

Actually, there is no home investment that is more economical over the years. Genuine wood paneling is not expensive to buy and it will outlive the home. It mellows and improves with age. It costs practically nothing to maintain, because there is no need for the frequent redecorating which is required for other types of wall coverage.

## KNOTTY PINE

This is one of the most popular of all wood paneling. Its natural, warm color and grain harmonizes with all decorative color schemes. It is easy to finish to a soft, lasting lustre that brings out the hidden beauty of the wood. It is easily cleaned or waxed. It is ideal for Dens, Attics and Game Rooms. It is inexpensive -- All the Knotty Pine Paneling for an average 10 x 12 foot room for only.....

AVERAGE ROOM

**\$79<sup>00</sup>**

## CALIFORNIA REDWOOD - RED CEDAR - CYPRESS

These woods have distinctive coloration, grain effects and texture. They offer you a choice for any room in the home where you wish something different... Libraries, living rooms, dens, kitchens and recreation rooms. These woods can also be used outdoors for modern or contemporary style homes. Enough Redwood Paneling for the walls of a room 10 x 12 feet, approximately.....

AVERAGE ROOM

**\$110<sup>00</sup>**

## OTHER EXOTIC WOOD PANELINGS

For more formal effects in living rooms, libraries, offices, etc. you may prefer Oak, Walnut or Mahogany paneling. Any of these woods take stain, var-

nish or lacquer for a beautiful, lasting finish. They can be speedily cleaned and waxed... will withstand long, hard use.

THERE ARE MANY OTHER UNUSUAL WOODS SUITABLE FOR PANELING. WE SHALL BE GLAD TO MAKE RECOMMENDATIONS TO SUIT ANY SPECIFIC DECORATING PROBLEM.

- **WILL NOT DEVELOP ODORS**
- **LIGHT—EASY TO HANDLE**

No other investment in your home pays off in such high dividends in year 'round comfort and cash fuel savings, year after year, as the money invested in insulation. Continuous blanket type insulation is easy to install and has a built-in vapor barrier for additional protection. Very few tools and no special skill is required. You merely place the blankets between joists, rafters or studs and easily fasten them in place. It's so easy you'll be amazed. And when the job is finished you'll reap the benefits for many years to come. Come in for additional information. We're glad to help.

Medium—for sidewalls . . . . . 6½¢ per Sq. Ft.—at Yard  
 Thick—for rafters or ceiling . . . . . 9¢ per Sq. Ft.—at Yard  
 Pouring Wool . . . . . \$1.65—40 lb. bag—at Yard

# BUILD YOUR

FOR AS LITTLE AS

**\$3290<sup>00</sup>**

**BASIC HOME WITHOUT BASEMENT**

Don't buy or build a home until you've gone over the plans for a Snively "Better-Bilt" house.

These lovely new homes can be quickly and economically

constructed by your own contractor..... or you can do it yourself at a savings in time, labor and materials never before possible in any type of home construction.

## SAVE ON MATERIALS

Snively's "Better-Bilt" homes are built with pre-assembled panels produced in our own lumber yards with standard, full-size materials. Solid wall panels, as well as panels with squarely framed windows are delivered to your lot at your convenience.

Everything is standard -- modular -- to give you the most house for your building dollar.

## WIDE CHOICE OF STYLES AVAILABLE

You get all the savings of mass production factory methods, plus a wide choice of individual house designs. Each home is built to meet your needs, and to reflect your own tastes.

**"BETTER-BILT" HOMES QUALIFY FOR FHA-VA MORTGAGE LOANS**

**16 BIG SAVINGS FOR THE HOME OWNER - SEE US TODAY**

Ideal for ventilating small areas such as under porches, above stoops, etc. Made of life time aluminum.

## GALVANIZED STEEL BARN ROOFING

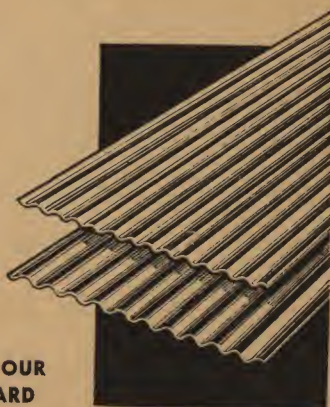

Proven by generations of experience on millions of farm buildings. A corrugated sheet is the strongest form of roofing as the corrugations stiffen the sheet to the highest possible degree. This, combined with the long lasting rust prevention provided by heavy galvanizing, makes a roof that is undoubtedly superior. Provides perfect protection for the barn and all its contents and equipment. Is fire resistant, and when properly grounded is lightning resistant. Fine in appearance.

Easily installed. Large variety of sizes and light weight simplify cutting and handling. Galvanized lead headed nails tightly seal nail holes, preventing seepage. 28 gauge. 26" width. 6', 8', 10' and 12' lengths.

EASY TO INSTALL  
1½" CORRUGATED  
26" x 8' SHEET

### THE INSULATING and BUILDING BOARD for NEW CONSTRUCTION and MODERNIZATION

### SEE HOW HOMASOTE BIG SHEETS MEAN BETTER CONSTRUCTION

The size of Homasote's extra big sheets add sturdiness, economy and trimness to any type of construction. These big sheets can cover an 8 foot by 14 foot wall in one piece instead of three pieces, thus using one-third as many nails and eliminating 22 joints per thousand square feet as compared to 4 foot widths. There are no unsightly bulges or gaps to decrease the insulating power or weaken construction. See illustration at left. Bends readily.

# MODERN OVERHEAD GARAGE DOORS

*Beautiful Stock Designs or Made to Order!*

## CALDER "STURDY" OVERHEAD DOORS

4 sections high, 6 panels wide.  
3rd section is glazed. Can be in-  
stalled in old or new garages.

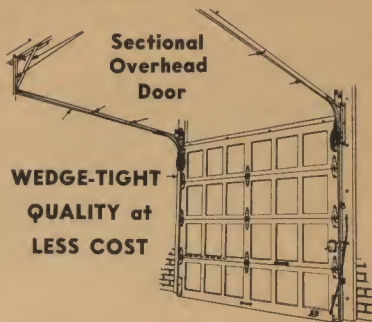

8-0 x 7-0 x 1-3/8.. **\$83.00**

9-0 x 7-0 x 1-3/8.. **\$92.00**

## "BETTER-BILT" OVERHEAD DOORS

A fine low cost door of great  
beauty and durability. 4 sec-  
tions high, 6 panels wide. 3rd  
section is glazed.

8-0 x 7-0  
x 1-3/8..... **\$72.00**

Gives you silent, easy, trouble-  
free use. Cannot be blocked by  
snow or ice. Ideal for garages where  
there is not much room. All hard-  
ware except lock handle is inside.  
Made up to any size.

## RUBBER CUSHION WEATHERSTRIP

Cushions door against hard  
drops. Makes door weather  
tight. Fits all bottom sec-  
tions.

**\$3.00**

## Electric Overhead GARAGE DOOR OPERATORS COMPLETELY AUTOMATIC!

Radio control or push button control.  
Operates safely and conveniently any  
overhead door. Openers are of rugged  
design and sturdy construction for de-  
pendable service. We are prepared to  
quote installation by one of our expert  
installers on request.

## CEDAR DOUBLE COURSE SIDEWALL SHAKES

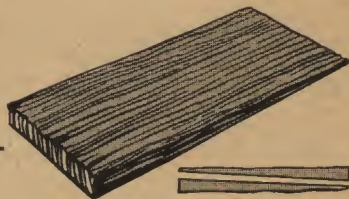

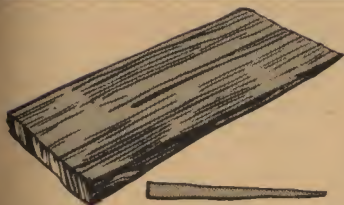

- Double Layer of Protection
- Prestained in a Wide Choice of Durable and Attractive Colors
- Interesting Texture
- Heavy Shadow Line
- Long Lasting
- Fast Application

Cedar double course sidewall shakes  
are the ideal modern sidewall. It com-  
bines traditional beauty and the lasting  
qualities of cedar to make America's  
foremost exterior wall for homes of  
all sizes. Double coursing gives you  
more style, more insulation and more  
dollar economy for your money.

## HANDSPLIT SHAKES

- HAND HEWN TO GIVE UTMOST IN  
CHARM AND CHARACTER
- LONGEST LASTING WOOD SIDEWALL
- REQUIRE MINIMUM MAINTENANCE

## TAPERSPLIT SHAKES

Cut from high quality clear  
cedar blocks with hand tools.  
Used since the colonial days  
these shakes reflect America's  
earliest architectural traditions,  
and will outlast, for their cost  
any other material available.

# RUBEROID

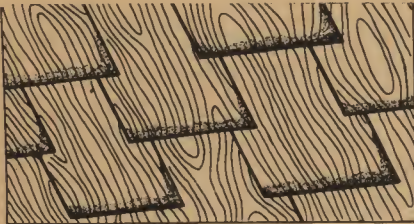

DURABLE ASPHALT

# ROOFING and MATERIALS LOK-TABS

A brand new shingle of premium construction and appearance. Lok-Tabs are built to lock... and last... and beautify every type of building. Ingenious built-in locking device holds the shingle down at the center of the butt. Even the strongest wind can't turn a Lok-Tab back. Bigger, easier and faster to work with. You use fewer shingles and fewer nails. Large color variety.

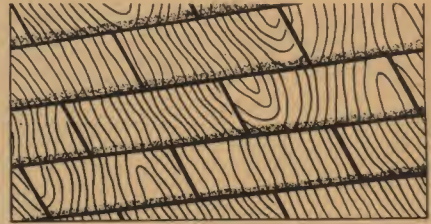

3 bundles  
per square **\$2<sup>75</sup>** per bundle

## DUBL-COVERAGE TITE-ONS

Heavy base felt, thoroughly saturated with extra heavy coatings of asphalt and extra thick layers of mineral granules. 210 pounds per square. 80 strips per square. 3 bundles per square. All colors.

3 bundles  
per square **\$2<sup>98</sup>** per bundle

## ASPHALT THICK-BUTTS

Self-locking with adjacent shingles at four points. Average approximate weight per square is 230 pounds. 120 shingles per square. 3 bundles per square. Various colors stocked. Unsurpassed in beauty!

3 bundles  
per square **\$2<sup>75</sup>** per bundle

## RUBEROID ROLL ROOFING

The original and still the best. Comes in rolls containing 108 square feet. Each roll is 36 inches wide and consists of a 36 foot length of roofing sufficient to cover 100 square feet of roof area, including the laps. Fast and easy to apply.

45 lb.....**\$2.30** per roll  
55 lb.....**\$2.90** per roll  
65 lb.....**\$3.40** per roll

## DUBL-COVERAGE ROLL ROOFING

Furnishes double-coverage for flat and gently sloping roofs. 17 inches is surfaced with mineral granules, with 19 inch selvage. Is nailed and cold-cemented on... won't blow off. Fire-resisting. Available in a large variety of colors. Economical, yet it wears and wears.

**\$2<sup>90</sup>** per roll

## MINERALIZED ROLL ROOFING

Combines the fire-resisting qualities and attractive colors of asphalt shingles with the utility and economy of smooth surfaced roofings. Made of strong roofing felt saturated and coated with the best grade of asphalt, finished with minerals that are dependable for protection and appearance.

**\$3<sup>90</sup>** per roll

## RUBBERINE ROOF COATING

A premium grade coating that is ideal for re-conditioning metal and composition roofing.

1 gal. **85¢** 5 gal. **\$3<sup>50</sup>**

## PLASTIC CEMENT

A heavy black composition made of pure asphalt and asbestos fibres for repairing leaky seams, etc. in metal and composition.

**22¢** 1 lb. **\$1<sup>10</sup>** 10 lb. **\$3<sup>95</sup>** 50 lb.

# FARMERS... WE CAN SUPPLY YOU WITH THE FAMOUS Ful-O-Pep

## FEEDS FOR LIVESTOCK AND POULTRY

### FUL-O-PEP CHICK STARTER

Start 'em right with a feed with extra food values for sound bodies -- strong bones -- good feathers. Results of National Egg Laying test prove -- officially -- that birds started and grown on Ful-O-Pep are America's best-laying pullets. Average production shows up to 15 extra eggs per hen per year!

### FUL-O-PEP EGG-BREEDER MASH

Keep your hens Fit -- not Fat! This low calorie ration feed with oats promotes top laying conditions because its extra food values make hens lay to the limit. Extra flock health factor keeps mortality low -- laying life long. Birds keep slim and trim -- not fat and lazy like many corn-based feeds may do.

### FUL-O-PEP CATTLE FEED

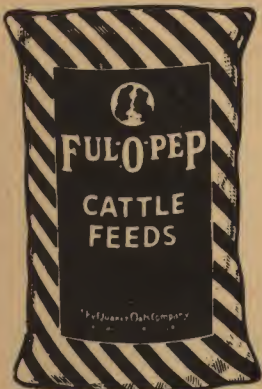

We have a complete line of Cattle Feeds to fit all needs. Calf Ration, Calf Starter, Fitting Feed, Dairy Feed, Milking Feed and 32% Dairy Concentrate.

Also Available -- Pro-Sweet Supplement Steer Fattener, Fitting Feed and many special steer feeds. All blended for economical feeding with high profit results.

### FUL-O-PEP TURKEY FEED

The rich feeding benefits of TURKEY STARTER help get poults off to a flying start -- promote high livability and rugged health. To balance grain and get fast, sound growth try TURKEY GROWER -- it promotes rugged health -- smooth even feathering -- at a low feed cost. Also available: Ful-O-Pep Turkey Finisher Concentrate Pellets for fast, sure finish.

## OUR LIVESTOCK AND POULTRY SPECIALISTS

are always ready to serve you! Our crew of trained specialists are available to aid you in feeding for profit. You may call upon them at any time without obligation.

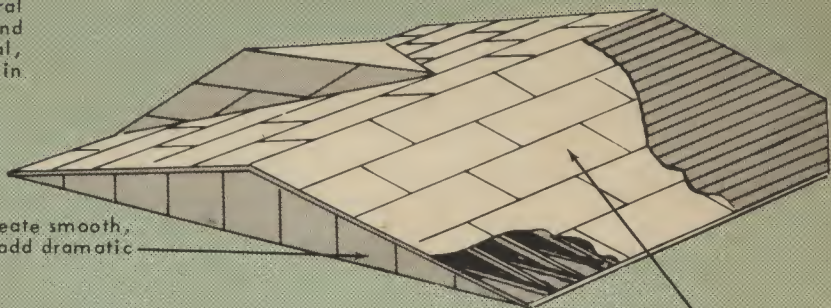

Headquarters for Ful-O-Pep Feeds for Livestock and Poultry

# Here's where you'll use fir plywood . . . all around your home

Fir Plywood is REAL wood - natural wood - with all of wood's warmth and beauty. It is a traditional material, stronger and lighter than wood in any other form.

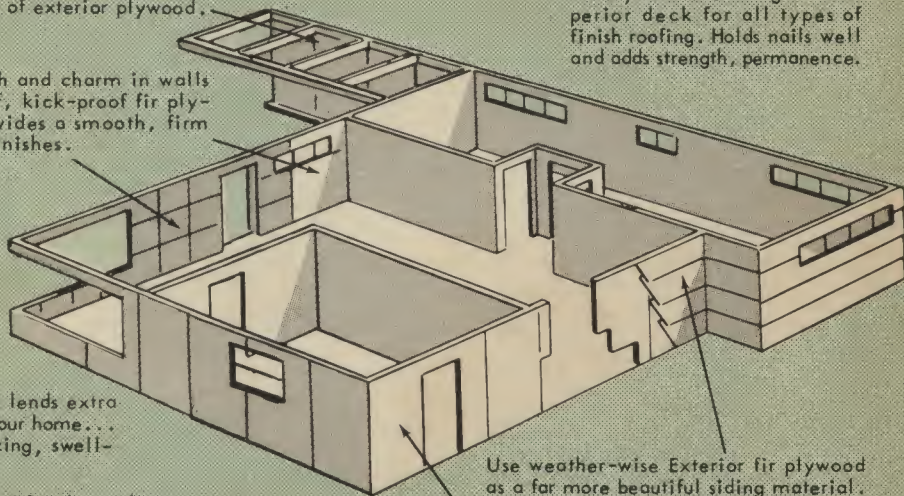

Big, durable plywood panels create smooth, flush areas for gable ends that add dramatic contrast to any siding material.

Live outdoors in comfort and privacy with wind-brakes, fences and screens of exterior plywood.

Fir Plywood sheathing is a superior deck for all types of finish roofing. Holds nails well and adds strength, permanence.

There's real wood warmth and charm in walls paneled with crack-proof, kick-proof fir plywood. Plywood also provides a smooth, firm backing for other wall finishes.

Fir plywood subflooring lends extra strength and rigidity to your home... tends to eliminate shrinking, swelling or squeaking.

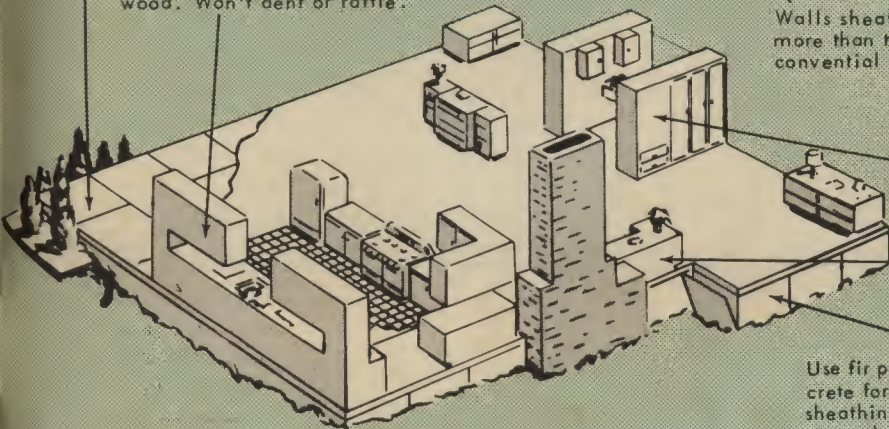

Kitchen cabinets of fir plywood can be planned to meet exact space needs. They have the warmth of real wood. Won't dent or rattle.

Use weather-wise Exterior fir plywood as a far more beautiful siding material. Long-lasting, fits any style architecture.

Walls sheathed with fir plywood are more than twice as strong and rigid as conventional diagonal boards.

Fixed furniture and built-ins of strong fir plywood are easy to build, attractive and take plenty of abuse.

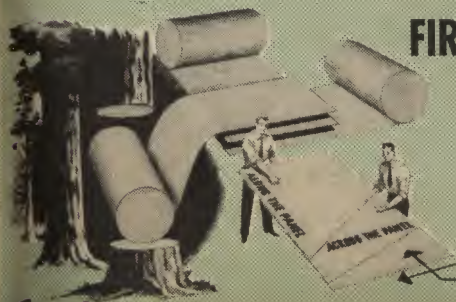

Use fir plywood for foundation concrete forms, then re-use panels for sheathing or sub-flooring. Double use - double economy.

## FIR PLYWOOD - wood's most modern form

Fir plywood - America's busiest building material - is real wood in large, light, extra-strong panels. Huge Douglas fir logs are peeled to form thin sheets of wood, called veneers, or plys. These are cross-laminated into panels made up of an odd number of plys, placed so that the grain of one ply is at right angles to adjacent plys. This unique construction distributes grain strength in both directions creating a super-strong material.

CROSS-LAMINATION GIVES **2-WAY** STRENGTH
